points					_____ x 10 =	
--------	--	--	--	--	--------------	--

Note: if dog fails to establish a 3 seconds point prior to catching or trapping a bird, no points will be awarded for the point.

caught birds					_____ x (-10) =	
--------------	--	--	--	--	-----------------	--

Note: this is a judgment call by the scorekeeper. A "caught" or "trapped" bird is defined as a bird in the dog's mouth, even if the dog releases the bird allowing the competitor to shoot the bird. If the competitor makes an honest attempt to gently foot flush the bird several times and it does not fly, it can be considered a non-performing bird with no penalty.

Ties use average time if harvested count is not the same for all dogs tied. Otherwise just use the sum of seconds. The results will be the same; the least seconds will be the fastest retrieve and winner.
